

## WHAT YOU NEED:

Square (or rectangular) Paper, Crayons, Markers or you can use Watercolor paint, Paintbrushes and Water. Black permanent markers (or black crayons or black oil pastels)

## WHAT YOU DO:

Draw a border on your paper. Don't worry if it is perfectly straight. Use permanent marker or crayon or oil pastel — your choice.

Draw an "x" somewhere on the paper.

At the end of each line, draw half a heart on one side of the line and half a heart on the other side.

Draw three leaves to create a shamrock (and leave the fourth line as a stem), or draw four leaves for a clover and draw two extra lines for a stem.

Make four sections in the background by drawing lines behind the clover (or shamrock).

Decide on a secondary color (orange, green or violet). Find two or more crayons in two shades of that color. (You might use markers, oil pastels or paint instead.) Color the leaves.

Fill in the background areas with the two primaries required to create the secondary color you used. This example uses watercolor paint but you could use crayons, or markers!

Here are other color combinations:
